TRANSIT CHASSIS CABS

Ford

Go Further

Visionary. Ingenious. Remarkable.
Every vehicle bears his signature.

Henry Ford

Image shown is Standard Dropside 350 L2 105PS FWD

Making light work of heavy jobs.

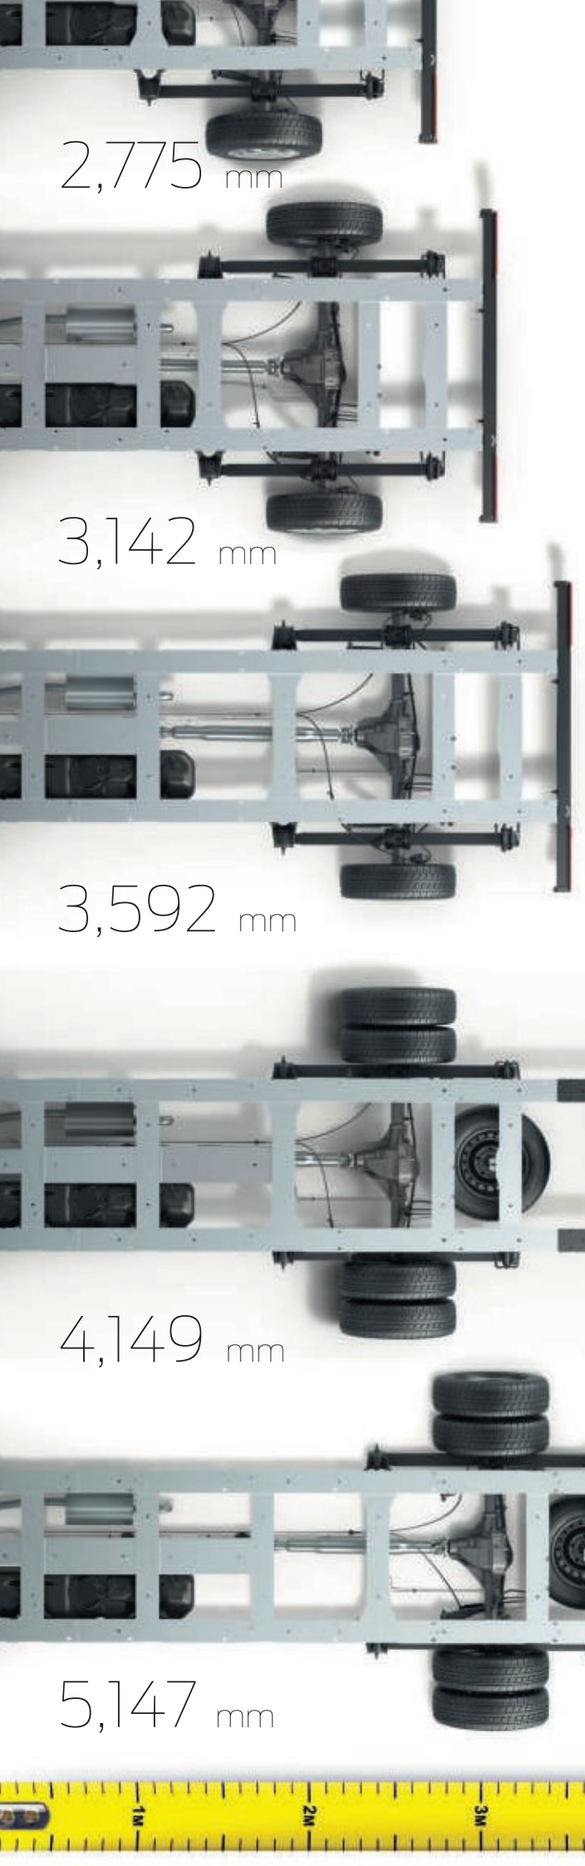

With five frame lengths, a range of GVMs from 3,140kg to 4,700 kg, a choice of front, rear or all-wheel drive*, and single or double cab styles.The Ford Transit Chassis Cab is a vehicle you can rely on when there is serious work to be done.

Towing ability

Transit Chassis Cab delivers outstanding payload and towing capability. The 350HD and 470 versions with high-rated suspension, 170PS engine and 7,000 kg gross train mass (GTM) can pull up to a maximum 3.5 tonnes of braked trailer load, when properly equipped. (Commercial users may need a digital tachograph. Option)

Model shown is a Standard Dropside Chassis Cab 350 FWD L2 Base in Frozen White solid body colour.
*All-wheel drive is available as an option on 350 L2 and L3 series.(Excludes Standard Dropside).

Tough choices.

Transit Chassis Cab combines the strength of a heavy truck with the agility of a light vehicle. Each hard-working derivative, from the L1 to the L5, has a robust ladder-frame chassis that provides a flat, strong base on which to build. While a choice of driveline configurations, cab styles and single or dual rear wheel axles add to its flexibility. From a box van, dropside or tipper, to a refrigerated body, mobile workshop, emergency services vehicle or camper, rest assured Ford offers a Transit Chassis Cab that's fit for the job.

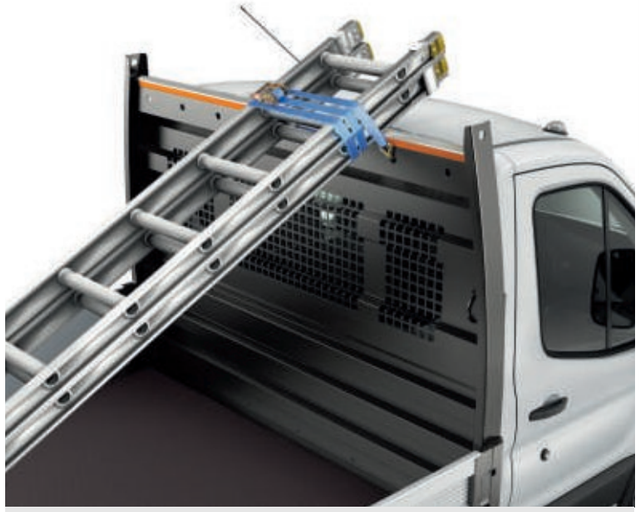

Frame lengths shown are for Chassis Single Cab models. For complete Chassis Cab dimensions please see pages 44/45.
Production models may vary from images shown.

Maximum versatility.

Transit Chassis Cab is designed and built for hard work. Its robust and rigid chassis provides an excellent foundation for fitting specialist bodies. For the convenience of operators who want a quick and simple solution, our factory-built Transit 'One-Stop' bodied chassis cab range is supplied fully-equipped and ready to go. All factory-built 'One-Stop' models are manufactured to our exacting standards and comply with the latest European Community Whole Vehicle Type Approval (EWVTA) legislation.

Chassis features

- Flat, strong ladder-frame enables a wide range of body conversions to be fitted
- Three Gross Vehicle Mass (GVM) variants, from 3,140 kg to 4,700 kg
- 350HD (Heavy Duty) version available for operators requiring greater trailer plate loading flexibility from a 3,500 kg GVM vehicle.
- Wheelbase and overhang dimensions suitable for industry-standard or non-standard body sizes
- Standard-width door mirrors accommodate body sizes up to 2,170 mm. Wide-body mirrors are available for bodies up to the legal maximum of 2,438 mm. (Option)
- Robust inverted closed 'top hat' section pressed high tensile steel frame (double 'top hat' for 350HD and 470 models)
- Integral body mounting points and bolt-on rear frame overhangs, where required
- Bolted closing member allows chassis length to be customised without welding
- Higher centre of gravity suspension as standard, to cope with large bodywork
- Electrical connections for additional exterior lighting, where required
- Side exit exhaust

Ready for work

Whichever industry you work in, Transit Chassis Cab is ready with a refined and rugged platform that's compatible with a wide range of bodies. Vehicles can be supplied with a choice of useful features, including an easily accessible load bed featuring a heavy-duty steel headboard. (Production models may vary from image shown.)

Room for the largest crew.

Transit Chassis Double Cab is a great solution for moving both crew and load at the same time. Wide-opening doors provide easy access to the spacious, well thought-out interior. While the dual front passenger seat and standard rear quad seat together offer comfortable accommodation for up to seven occupants, including plenty of underseat stowage possibilities.

Model shown is a Transit Chassis Double Cab with Low Visibility Pack (Option), manual air conditioning (Option), passenger's* airbag (option), Lane-Keeping Alert, and SYNC 3. Navigation System (Option). Production models may vary from images shown.

***Note: A rear-facing child seat should never be placed in the front passenger seat when the Ford vehicle is equipped with an operational front passenger's airbag.**

Underseat stowage
Dual passenger seats feature lift-up base cushions and underseat stowage compartments, enabling tools and equipment to be carried out of sight.

Speak and Transit listens.

New Ford SYNC 3 gives you control of everything from music to phone calls, apps and text messaging through simple voice commands. The intuitive 6" colour touchscreen lets you configure your home screen just how you want it, while Applink, Apple® CarPlay and Android Auto, allow you to bring your smartphone HMI into your vehicle. Live Traffic** is available through the FordPass app connecting seamlessly via SYNC 3 with navigation* Live Traffic gives you up-to-the-minute traffic data, enabling you to avoid congestion and save you time.

*Ford SYNC 3 navigation is optional.

**Live Traffic access is free for the first 2 years following the registration of a new Ford featuring SYNC 3 with Navigation; thereafter there is an annual licence fee. Mobile data charges may apply.

Please note: Full SYNC 3 smartphone integration only available with iPhone® 5/Android 5.0 (Lollipop) or higher. Some SYNC 3 functions require a data connection, so mobile data charges will apply. To check whether Apple® CarPlay and Android Auto are available in your market, please check official Apple® CarPlay and Android Auto websites for the latest information.

SYNC

All-wheel drive confidence.

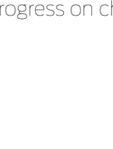

When the going gets tough, nothing beats the sure-footed performance of all-wheel drive. Available on selected models*, Transit's latest intelligent AWD system has been specially engineered to deliver optimum traction and enhanced stability in combination with the all-new Ford EcoBlue diesel engine. Together with the new engine's increased levels of low-end torque, the latest generation AWD system enables drivers to achieve smoother, more confident progress on challenging surfaces.

Optimise your drive.

Transit's all-new 2.0-litre Ford EcoBlue diesel engine is offered with a choice of three power and torque outputs, each driving through a 6-speed manual transmission. All engines comply with the Euro6 emissions standards. Selected engines are available with front, rear or all-wheel drive.

All-wheel drive is available on:

- *350 L2 and L3 Single Chassis Cab
- *350 L3 Double Chassis Cab

Front-wheel drive

- Engine availability:
- 105PS(360Nm), 130 PS(385 Nm) and 170PS(405Nm)
- Lower kerb mass for greater payload and fuel efficiency
- 6-speed automatic transmission available as an option (130 PS engines

Rear-wheel drive

- Engine availability:
- 105 PS(360 Nm), 130 PS(385 Nm) and 170 PS(405 Nm)
- Superior traction when heavily laden
- Best suited for towing and heavier duty applications.

All-wheel drive

- Engine availability:
- 130 PS(385 Nm).
- New fourth-generation driver-selectable AWD system provides extra traction in difficult driving conditions
- Under normal conditions drive is directed to the rear wheels. When engaged, the system automatically increases engine torque to the wheels with the most grip

All-wheel drive, for all-weather working

Transit's latest all-wheel drive (AWD) system automatically distributes engine torque to the front and rear wheels using a specially developed electronically-controlled AWD coupling. In conjunction with the vehicle's ESC system, the front/rear torque distribution can be varied between 0:100 and 50:50. Two modes are provided, with the standard AWD Auto mode suitable for most driving situations, and an AWD Lock mode that enhances traction in more extreme driving situations such as sand or snow.

Designed for business, built for hard work.

Ford Transit's 2.0-litre Ford EcoBlue is a completely new generation of advanced, high-performance diesel engines. More powerful, cleaner, refined and extremely efficient with low running costs†, Ford EcoBlue diesels build on the industry-leading performance and technology of our award-winning Ford EcoBoost petrol engines.

Key benefits include:

- **Fuel consumption and CO_2 emissions reduced by up to 13 per cent†**
- **Improved performance with low-rpm torque increased by 20 per cent†**
- **Computer-optimised engine design for minimum noise and vibration**
- **Lower nitrogen oxide (NOx) emissions in line with Euro6 standards**

†Comparison made to the previous 2.2L Duratorq TDCi EU Stage 5 engine for the prior model.

New from the ground up, the all-new Ford EcoBlue diesel engine enhances fuel efficiency by up to 13 per cent compared with the previous 2.2-litre TDCi engine, with fuel consumption from 41.5 mpg* (6.8 L/100km*) and CO_2 emissions from 176 g/km*, and delivers significant improvements in low-rpm torque for enhanced driveability.

Each engine in the range – 105 PS, 130 PS and 170 PS – uses state-of-the-art Ford design, including low friction technologies, ultra-high pressure fuel injection and the latest turbocharger and combustion technology to deliver low NOx emissions in line with the Euro6 standards. What's more, the new engine also benefits from up to 2-year/36,000 miles (whichever comes first), variable service intervals to further reduce the cost of ownership.

130 PS from 41.5 mpg (6.8 L/100 km*), 176 g/km. NEDC Combined Cycle test figures.

55% less NOx than the previous standard.

Greater performance, fewer emissions.

Transit's all-new 2.0-litre Ford EcoBlue diesel engines comply with the Euro6 emissions standards, which specify a 55% reduction in nitrogen oxide (NOx) emissions versus the Euro5 emissions standard. A Selective Catalytic Reduction (SCR) system uses AdBlue®, a urea/water-based fluid to convert NOx emissions in the exhaust gas into nitrogen and water. A particulate filter then reduces more than 99% of emitted solid particles from the vehicle's exhaust.

Choose the engine that's right for you.

360 Nm
105 PS
From 179 g/km*

More efficient†

All-new 2.0L Ford EcoBlue 105 PS

Engineered to meet the Euro6 emissions standards, Transit's all-new 2.0-litre Ford EcoBlue 105 PS (77 kW)/360 Nm diesel engine combines outstanding fuel efficiency (from as low as 40.9 mpg* combined) with excellent driveability and refinement. Its state-of-the-art Ford design helps to keep running costs down without compromising on payload or performance.

385 Nm
130 PS
From 176 g/km**

More flexible†

All-new 2.0L Ford EcoBlue 130 PS

The all-new 2.0-litre Ford EcoBlue 130 PS (96 kW)/385 Nm Euro6 diesel engine strikes a performance balance. It delivers extra power and torque necessary to enhance Gross Train Mass (GTM) and braked trailer plate without compromising emissions.

**130PS from 176 g/km. NEDC Combined Cycle test figures.

405 Nm
170 PS
From 179 g/km***

More powerful†

All-new 2.0L Ford EcoBlue 170 PS

The outstanding all-new 2.0-litre Ford EcoBlue 170 PS (125 kW) Euro6 diesel engine develops an extraordinary 405 Nm of torque. As the most powerful engine in the range, its hard-working character makes it the ideal choice for moving heavy loads and towing, while still delivering outstanding fuel efficiency (from as low as 40.9 mpg*** combined).

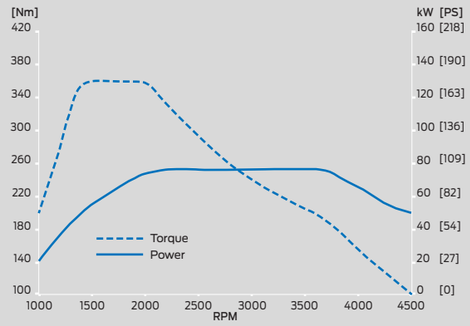

More torque. More pulling power.

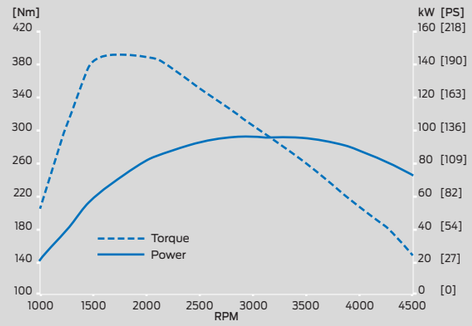

With more peak power and torque, and up to 20% more low-end torque than the equivalent prior-generation engine†, each of the 2.0-litre Ford EcoBlue engines provides excellent performance, both in terms of fuel economy and flexibility. A choice of three power and torque outputs means there's an engine to suit the demands of every job.

†Comparison made to the previous 2.2L Duratorq TDCi EU Stage 5 engine for the prior model.

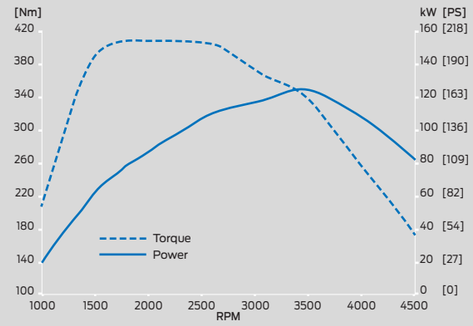

105 PS (77 kW) all-new 2.0L Ford EcoBlue

130 PS (96 kW) all-new 2.0L Ford EcoBlue

170 PS (125 kW) all-new 2.0L Ford EcoBlue

SelectShift automatic transmission

Transit's six-speed SelectShift automatic transmission delivers a smooth, relaxing driving experience, especially in busy stop-start traffic. The transmission allows you to change gear manually, if you prefer, using the facia-mounted gearshift. Additonally, it provides the ability to lockout gears in more challenging driving conditions, e.g. on slippery surfaces or steep gradients.

The sum of all parts adds up to less cost.

Quality and durability are built into Transit Chassis Cab at every step. After many years of service it will feel as good, and be as rewarding to drive, as the day you picked it up.

Extended variable service intervals of up to 36,000 miles or two years (whichever occurs first) helps reduce your running costs.

Auto Start-Stop automatically switches off the engine when you come to a halt and put the vehicle in neutral. Restarts smoothly when you want to move off, reducing fuel consumption and exhaust emissions. (Option. Standard on models with automatic transmission. Not available with AWD)

Engine oil monitor warning light will illuminate if the condition of the engine oil deteriorates between services. (Standard)

High-level headlight units are mounted above the bumper line, to help keep them out of harm's way and protect them from low speed accident damage. (Standard)

Brake pad wear sensors warn when the pads are due for renewal. (Standard)

Fuel filter sensor warns of water ingress or a blockage of the fuel system. (Standard)

Ford Easy-Fuel capless refuelling system a unique safeguard ensures that nobody can accidentally fill up with the wrong fuel. Plus, no dirty fuel caps to touch. (Standard)

12-year perforation warranty provides reassurance against perforation of the bodywork from the inside of the panel. (Standard) Terms and Conditions apply.

Side Wind Stabilisation[01]
Helps the driver to stay in lane in strong, gusty conditions by using the ESC system to sense when the vehicle is being affected by crosswinds. (Standard)

Driver Alert[02]
Designed to warn you if the system detects driving behaviour that indicates a drop in alertness levels. Initially, a warning icon is displayed in the instrument cluster, followed by a warning chime if driving alertness further declines. (Option as part of Lane Keeping Alert Pack. Standard on 350HD & 470 models)

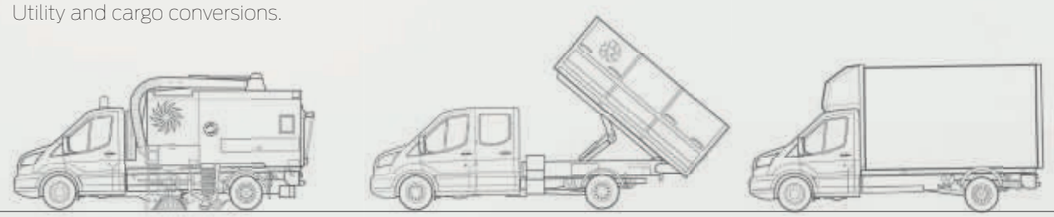

When there's no time to think, Transit's already reacted.

Lane-Keeping Alert[02*2]
It only takes a momentary slip in concentration to drift out of your lane when driving on the highway. Lane-Keeping Alert is designed to recognise when you approach the road markings without using the indicator, and alerts you with vibrations through the steering wheel. (Option)

[0]Uses sensors.
*Operates at speeds over 45mph on multi-lane roads with clearly visible lane markings.
[1]Safety feature.
[2]Driver assistance feature.

Utility and cargo conversions.

Outstanding flexibility

Transit Chassis Cab is the ideal vehicle range for specialist conversions. The combination of a high tensile steel frame construction, integral mounting points and low frame rails allow Transit to fulfil a multitude of tasks, with little or no modification.

In great shape for bodybuilding.

Throughout Transit Chassis Cab's development we worked closely with the bodybuilding industry to ensure that all standard body types, and most bespoke solutions, can be fitted easily and efficiently. A choice of cab styles, frame lengths and driveline configurations provide a solid base for a variety of conversions, and mean that almost any adaptation is possible.

Body conversions shown are for illustrative purposes only. Production models may vary from images shown.

Note: technical information for vehicle converters can be found online via the Body and Equipment Mounting Manual (BEMM).

Base

Exterior features

- Daytime running lights
- Roof marker lights
- Side marker lights (L4, L5 and those fitted with wide dropside floats)
- Door mirrors with large blind spot eliminator
- Door mirrors with integrated side indicators
- Half cap wheel covers (front wheels only for dual rear wheel models)
- Headlight courtesy delay
- Wide bodyside mouldings
- Wide-opening 2nd row rear doors (with fixed windows) (Chassis Double Cab)

Interior features

- Dual passenger's seat with underseat stowage compartment
- Quad rear passenger seat with lift-upseat stowage compartment(Double Chassis Cab)
- Electrically-operated front windows
- Remote central locking
- My Connection radio with Bluetooth*, USB/iPod connectivity, remote audio controls and four front speakers
- Trip computer
- Driver's 4-way seat adjust
- Rake-and-reach adjustable steering column
- Front overhead console
- Gearshift Indicator light
- Courtesy lights with theatre dimming
- Easy-clean rubber floor covering in cab

Option Pack

- Low Visibility Pack (contents include heated windscreen, washer fluid sensor and electrically-operated and heated door mirrors)
- High Visibility Pack (contents include power heated and power fold mirrors, Quickclear windscreen, automatic headlights, rain sensitive wipers and front fog lights)
- SVO Double Cab Utility Area A989: Wide-opening 2nd row rear doors (with unglazed windows) (Chassis Double Cab)
- Lane-Keeping Alert: Driver Alert, Leather Steering Wheel, Quickclear, Trip Computer and Cruise Control

For further option availability, please refer to the specification section.

Engines

- 105 PS (77 kW)/360 Nm
- 130 PS (96 kW)/385 Nm
- 170 PS (125 kW)/405 Nm

Ford Transit One-Stop

Ford Transit One-Stop

Ford Transit is renowned for its versatility and flexibility, Transit is the ideal platform for a wide range of specialist applications and bespoke conversions. What's more, for the convenience of those operators who want a quick and simple, work-ready solution, Ford offers the Transit 'One-Stop' range of bodied Chassis Cabs.

Chassis Cab L2 shown

Single rear wheel/Dual Rear Wheel Pack available as an option on 350 series; DRW standard on 470 series
Internal body length 3220 mm

3,500-4,700
kg GVM *

One-Stop 1-way Tipper

Strong, rugged and purposeful, the Ford Transit Tipper represents superb functionality, with quality of design and manufacture. It is seen as a versatile, reliable partner by a wide range of industries where safety and productivity are paramount.

Tippers are expected to operate in adverse conditions and are subject to a wide range of payloads. SRW provides increased payload whilst Transit's DRW rear wheel drive configuration provides excellent traction and loading lattitude often required on and off site.

Available in two cab formats: Single Cab; and the flexible Double Cab with crew seating and glazed crew doors as standard. Alternatively, no crew seating with windowless rear crew doors can be specified to form the basis of a Utility Cab conversion. This provides a secure load space behind the driver in the crew compartment. Optional bodywork equipment is available from the bodywork supplier via your Ford Transit Specialist Dealer*. Typical options include polytarps, toolboxes, amber beacons, chevrons, ply or polypropylene load liners, rear light guards, and tow bars with a range of ball or clevis couplings and various pin electrical.

Features include:

- 1-way rear tipping capability
- Powder-coated, hot-dipped galvanised steel construction
- Tough roll form to rear floor edge
- Body colour dual-skin aluminium side and tailboards
- Pull-up load-lashing points in load bed
- Sheeting hooks to underside of load bed, front headboard and rear
- Twin AGM battery electrical system
- Programmable Battery Guard
- 5-stage chrome-plated underfloor ram
- 2 kW electro-hydraulic power pack
- 45-degree tip angle
- Single rear wheel/Dual rear wheel (DRW Standard on 470)
- Production models may vary from those shown.
- TÜV certification for safety and production conformity
- Machinery Directive - TUV 2006/42/EC 2009/19/EC conformity approved.
- 3-year 100,000 mile warranty
- DRW Pack available as an option on 350 series. DRW standard on 470 series.

Range Available:

- Chassis Single Cab 1-way Tipper (L2)
- Chassis Double Cab 1-way Tipper (L3)

Bottom-hinged tailboard

'Tip-over' tailboard configuration controlled by latches mounted in the rear pillars, suitable for most applications, especially large bulk loads.

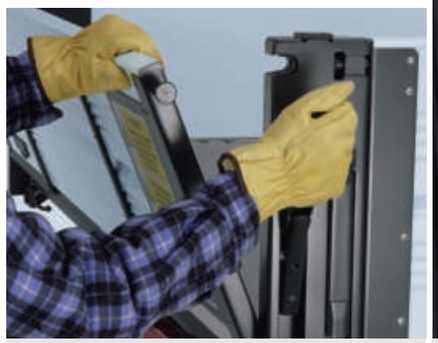

Dual-mode hinged tailboard

Standard dual-mode top and bottom-hinged tailboard. Top-hinged or 'Tip-thru' operation controlled by side-mounted remote lever.

Sequenced hydraulic body hold-down

Fully-automatic and controlled by hydraulic line pressures requiring no intervention by the operator.

Side pillar-mounted latches

Steel latches for sideboards and tailboard. Handle folds out of the way when unlatched and is removable for repair or replacement.

Tipper controls

Tipper 'Control Station' located adjacent to the driver's seat, houses all the Tipper controls.

Chassis Cab L2 shown

One-Stop 3-way Tipper

The Ford Transit 3-way Tipper is engineered to the same high standards as the 1-way Tipper, with the added benefits of tipping to both sides of the vehicle, as well as to the rear.

The 3-way Tipper represents the ultimate in site vehicle versatility, and is especially useful on sites with restricted access. In addition to the standard dual mode top and bottom hinged tailboard, the sideboards can be retained by chains to dispense the load away from the vehicle, or dropped fully to allow easy material loading and off-loading.

Robustness and durability are qualities that every Tipper operator is looking for. Any items that are likely to get damaged or worn are designed to be replaced and maintained easily, helping to reduce downtime and maintenance costs.

Features include:

- 45-degree tip angle – rear, nearside, offside
- Chrome-plated 5-stage underfloor ram with built-in shock absorber
- Tough roll-form edge to load deck sides and rear
- Plug-in wander lead pendant control handset
- Twin AGM battery electrical system
- Programmable Battery Guard
- Top- and bottom-hinged tailboard
- Sideboard 90-degree retaining chains
- 3 year 100,000 mile warranty
- TÜV certification for safety and production conformity
- Machinery Directive - TUV 2006/42/EC 2009/19/EC conformity approved.
- DRW Pack available as an option on 350 series. DRW standard on 470 series.

Range available:

- Chassis Single Cab 3-way Tipper (L2)
- Chassis Double Cab 3-way Tipper (L3)

* Please refer to Weights and Loads section for more infomration
Production models may vary from those shown

Remote wander lead handset

Plugs into socket below driver's seat giving the operator control when side tipping.

Configuration bar

Ensures correct fitment of pivot index pins to enable side or rear tip pivot configurations.

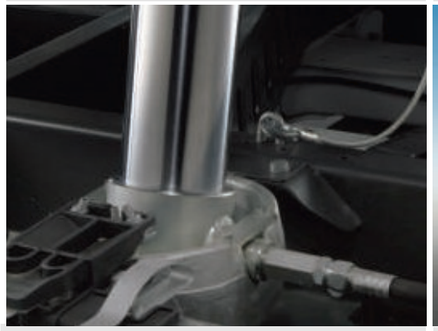

Pivot pins

Control the tip configuration by locking or releasing ball-and-socket body pivots.

Integral body prop

Essential for routine maintenance and inspection.

5-stage chromium-plated underfloor ram

Mounted in a steel gimbal with electrical limit switches controlling angle of tip.

Top-hinged tailboard

'Tip-thru' tailboard ideal for 'fluid' loads, such as sand, gravel and top-soil.

Premium and Standard Dropside

The Ford Transit Premium and Standard Dropside are stylish, easy-to-drive vehicles for operators seeking a cost-effective, yet professional image for their business. Body lengths available are L1 to L5 and payloads range up to 2,323 kg, To compliment the Premium Dropside various accessories are available to ensure more specific requirements are met

From 2.93 to 5.30 metres, there is a model to suit most operating needs.

Standard Dropside L2 shown

Premium Dropside
Single rear wheel/Dual rear wheel
FWD/RWD/AWD
Internal body length 4230 mm

3,100-4,700
kg GVM *

Premium Dropside Features include:

- Replaceable resin-bonded 15 mm ply load deck
- Substantial all-steel powder-coated headboard
- Double Skinned body colour aluminium sideboards and tailboards with integral bump rubber
- Flush-mounted load-lashing rings to raves, plus roping eyes to underside of raves plus roping eyes to underside of raves.
- Robust, lightweight aluminium and steel subframe
- Wider range of powertrains, drive lines and GVM's available
- Premium Dropside available L1 - L5
- Single and double cab FWD, RWD, AWD and Automatic
- ESC/ABS/Hill Start Assist
- ECWVTA 2007/46/EC Approved

Range available:

- Single Chassis Cab L1 - L5 310 - 470 GVM
- Internal body lengths - 2850 - 5223 mm
- Double Chassis Cab L3 - L4 350 - 470 GVM
- Internal body lengths - 2850- 4230 mm

Standard Dropside Features include:

- Stainless steel tailboard 90 degree retainers
- Fold out step access to bed with step in tailboard
- Aluminium unpainted side and tail boards
- Headboard lashing/D Rings
- Factory produced reducing lead times
- Additional 100kg payload versus Premium Dropside model comparison
- Competitively priced versus Premium Dropside
- ESC/ABS/Hill Start Assist
- Standard Dropside available L2 350 105PS FWD only

Range available:

- Single Chassis Cab L2 350 105PS FWD only
- Internal body length 3205 mm

Range available:

- Single Cab L1 - L5
- Double Cab L3 - L4

- Load bed access is a key requirement for Dropside users, therefore on the Premium Dropside four steps are provided enabling access with the sideboards raisedor lowered. In additio, two profiled grab handlesensure safe access for the operator,
- A generous number of load anchor points are available on the Premium platform and headboard, ensuring the payload can always be safely retained.
- To compliment the Premium Dropside a range of accessories are available.
- Tail-lifts, load cranes, toolboxes, beacons and bespoke paint schemes can be specified on Premium Dropside to meet the demands of an increasing variety of operating tasks.

* Please refer to Weights and Loads section for more information

Fold-out steps

Allow access with sideboards lowered.

Box Van Chassis Cab L4 Shown

Not available from November 2018

One-Stop Luton Van

The addition of Front Wheel Drive , also available in L3 and L4, built to take every day knocks, provides even more One Stop Shop choices. FWD offers increased payload versus RWD. Constructed using Polyester/Foam-Core panels, durable and robust enough to cope with everyday knocks, and harsh use meted out in multi-drop distribution. The FWD drivetrain provides the customers with the choice of automatic or manual transmission.

The steel door frame includes the necessary fixation points for optional tail-lift installation.

A range of optional bodywork equipment provides true flexibility, allowing you to tailor the body to match your specific requirements.

With a choice of 130 PS or 170 PS all new Ford EcoBlueTDCi diesel engines, a comfortable cab and a host of convenient features, including an easy open rear shutter and translucent plastic roof, the FordTransit Luton Van makes perfect sense all round.

Features include:

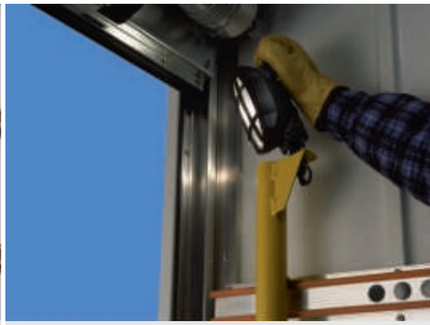

- 3490- 4090mm internal load length
- 2025 - 2125mm internal load width, Rear wheel drive models feature wide body
- Box constructed of 2 piece profile system. No externally visible fixations or sealing
- Dead lock body-coloured aluminium slat roller shutter with pull bar handle
- Internal emergency rear door release and sidewall-mounted load restraint rails
- Up to 20.1m³ load space capacity (L4 DRW)
- 15 mm phenolic resin-bonded two-piece plywood floor
- Full-width aluminium Hi Viz rear step for variants less Tail-lift
- Full-height internal acess grab handle
- Overhead stowage
- Body finished Frozen White
- Luton Van products and optional features are ECWVTA compliant

Images are for reference only and may differ between converter

Load retention poles

Multi-position, telescopic load retention poles available from converter at additional cost.

Internal spot light

Rear-mounted spot light with switch, adjustable to allow coverage inside and outside of the load area.

Grab handle and step

Standard nearside bulkhead mounted grab handle with optional side underrun guard step, tubular stirrup step fitted as standard.

Rear shutter

Wide-slat rear shutter gives maximum internal headroom.

Load anchors

Load anchorage points located in the lower rail.

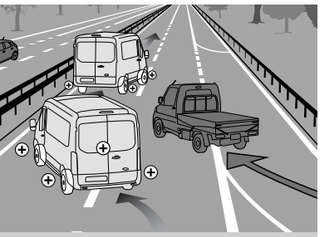

Electronic Stability Control

Ford Transit is fitted with Electronic Stability Control (ESC)[Ø1)] as standard. The advanced system constantly monitors the path the vehicle is following and compares it to the driver's intended course. If ESC senses a significant difference, it automatically reduces engine torque and applies brakes to individual wheels to help stabilise the vehicle and keep it on track.

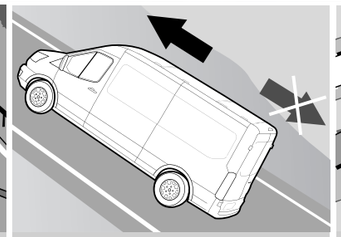

Side Wind Stabilisation[Ø1)]
Helps the driver to stay in lane in strong, gusty conditions by using the ESC system to sense when the vehicle is being affected by crosswinds. (Standard).

Curve Control[Ø1)]
Senses when a driver takes a curve too quickly, and can rapidly reduce engine torque – and apply brakes to individual wheels – to help keep the vehicle under control. (Standard)

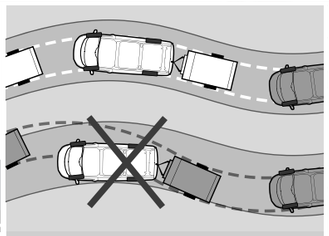

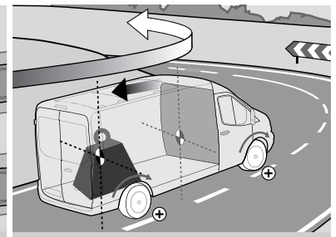

Roll Stability Control[Ø1)]
Ford's unique roll-rate sensor helps the Roll Stability Control system to keep the tyres grounded under conditions of high centre of gravity and when driving through off-camber turns. (Standard)

Hill Start Assist[Ø2)]
Designed to temporarily prevent you from rolling down a slope when you move your foot from the brake pedal to the accelerator pedal. It works in forward and reverse gears, so is ideal for towing and pulling heavy loads. (Standard)

Trailer Sway Control[Ø1)]
When it detects trailer sway, the system is designed to reduce engine torque and apply the brakes to the appropriate wheel(s) to help maintain control. Standard, with Ford factory-fit towbar.

Load Adaptive Control[Ø1)]
Designed to adjust the responses of the ESC[1)] system to compensate when the vehicle is unladen, partially- or fully-laden. (Standard)

Get the most from your new Ford

We want to help you get the most from your new Ford. And to do that, you need to know how much it is designed to safely carry. Your Ford Transit Centre can provide professional advice on important specification aspects, and help to find the right chassis for your budget and business needs.

The Ford Transit is designed to carry cargo – and lots of it.
Choosing a new vehicle is an important decision with lots of factors to be considered. While some aspects, like selecting the most appropriate derivative, identifying the intended primary use are relatively simple, others, such as calculating payload are more complex.

Payload capacity
To calculate payload, you need to know two things: the vehicle's gross vehicle mass (GVM) and its kerb mass.

GVM is the maximum permissible weight of the vehicle when loaded and ready to go – that includes the weight of the vehicle itself, ancillaries, driver and crew (assuming the industry standard weight of 75 kg/person), fluids, fuel tank 90% full (1 litre of diesel = approximately 0.85 kg), optional and aftermarket equipment, and cargo.

For simplicity, Ford Transit models are designated according to their GVM. For example, a 350 has a GVM of c. 3,500kg; and a 310 has a GVM of c. 3,100 kg.

Kerb mass is the weight of a standard-specification Base series vehicle, including fluids and fuel tank 90% full, but without the driver, crew or cargo.If you intend to load the vehicle close to its maximum capacity, it is recommended that you add a margin for error of 5% of the kerb mass to the kerb mass figure before calculating payload, to reduce the risk of overloading.

Payload is the difference between the two.

Gross vehicle mass minus **kerb mass** = **payload**

So to help you choose the right vehicle for your needs, here are some more detailed explanations about the factors that can influence a vehicle's payload. These include, but are not limited to:

Driver and crew
We calculate the weight of the driver and crew based on the industry-standard weight of 75 kg/person. Remember that the driver and crew are not included in the kerb mass figure, so when a driver or crew boards the vehicle, its payload will be reduced accordingly.

Factory-fitted options
Most factory-fitted options will affect a vehicle's payload. For example, air conditioning can add approximately 18 kg to a vehicle's weight, and therefore reduce its payload accordingly.

However, specifying a single front passenger seat in lieu of the standard dual seat will reduce the vehicle's weight by approximately 12 kg, and increase its payload by the same amount. Your Ford Transit Centre will be able to tell you what features can add or reduce your vehicle's kerb mass and by how much

Series
All kerb masses quoted in this brochure are for standard-specification models.

Manufacturing tolerances
Variations in manufacturing and production processes mean that no two vehicles are likely to weigh exactly the same.

Accessories and aftermarket conversions
It is important to think carefully about what to do with your vehicle after you take delivery. Any accessories fitted or aftermarket conversions to the vehicle may adversely affect its payload. Please speak to your Ford Transit Centre for more information and advice.

If payload is critical to your business, or if you plan to carry cargo at, or close to, the vehicle's maximum capacity, your Ford Transit Centre can help. Using their specialist expertise and knowledge, they can advise you on the exact specification of vehicle required to meet your individual business needs.

Note: Technical information for vehicle converters can be found online via the Body and Equipment Mounting Manual at www.etis.ford.com ; go to >information >vehicle conversions.

Configure your vehicle to suit your job

Ford Commercial Vehicles are available with a wide range of standard and optional features. Your Ford Transit Centre can help you ensure that you specify the right vehicle features for your specific business needs, including technical items to aid aftermarket fitment of specialist equipment or conversion.

FWD = Front-wheel drive, **RWD** = Rear-wheel drive, **AWD** = All-wheel drive, **L1** = Short wheelbase, **L2** = Medium wheelbase, **L3** = Long wheelbase, **L4** = Long wheelbase extended length, **L5** = Extra-long wheelbase, **SRW** = Single rear wheels, **DRW** = Dual rear wheels. Figures apply to Stage 6 LDTIII Chassis Cabs without Auto-Start-Stop unless otherwise stated. ***Kerb mass** is affected by many factors such as bodystyles, engines and options. It is the weight of a standard-specification base vehicle (different series will have different kerb masses), including fluids and fuel tank 90% full, but without the driver (75 kg), crew or cargo. Payload within this guide is the difference between gross vehicle mass (GVM) and kerb mass with a further 75 kg deduction for the weight of the driver. It must be noted that actual weight will always be subject to manufacturing tolerances which may result in payload variations between this guide and actual weight. For customers intending to load vehicle close to maximum payload, we suggest you also add a margin for error of 5% of Kerb Mass to the Kerb Mass figure before calculation, to reduce risk of overloading. NB: It is the responsibility of the vehicle operator to ensure their vehicles are legally compliant for road use. For Rear Float option vehicles, kerb mass is increased and payload reduced

Engineered for maximum traction

Braking system and all-wheel drive

Whatever the working environment, Transit makes driver and passenger protection its top priority. Standard safety features include ABS with Emergency Brake Assist (EBA) to help reduce emergency stopping distances. Larger brake pads and discs last longer and are more resistant to brake fade, while wear sensors indicate when pads are due for replacement. For more challenging conditions, Transit is available with all-wheel drive (AWD)*. This latest system automatically directs more drive to the front axle for optimum traction, and can also operate pre-emptively to help avoid wheel slip by monitoring the driver's actions.

*All-wheel drive is available on L2 and L3 350 series.

Note: All engines are Stage VI and include Selective Catalytic Reduction system (AdBlue®). [00]The illustrated axle ratio shown is the one available dependent upon model, payload and engine combination. [0]**Gross Payload** = Gross vehicle mass, less kerb mass. **GVM** = Gross vehicle mass. The total permissible all-up weight of a rigid vehicle – i.e. with body, payload, ancillaries, fuel, oil, water, driver and crew. ***Kerb mass** = The weight of the complete vehicle and all equipment including fuel and water, but without payload, driver or any crew. All kerb masses quoted are subject to manufacturing tolerances and are for Base models with minimum equipment- unless stated otherwise. Higher specification models will have greater kerb masses and, therefore, lower payloads due to the increased amount of standard equipment. Any additional options specified on the vehicle will reduce the payload accordingly. **GTM** = Gross train mass. The total permissible all-up weight of a rigid vehicle (see GVM) together with its trailer and load. For customers intending to load vehicles close to the maximum payload, we suggest you also add a margin for error of 5% of Kerb Mass to the Kerb Mass figure before calculation, to reduce the risk of overloading.

The drive for cleaner air

Driving with AdBlue®

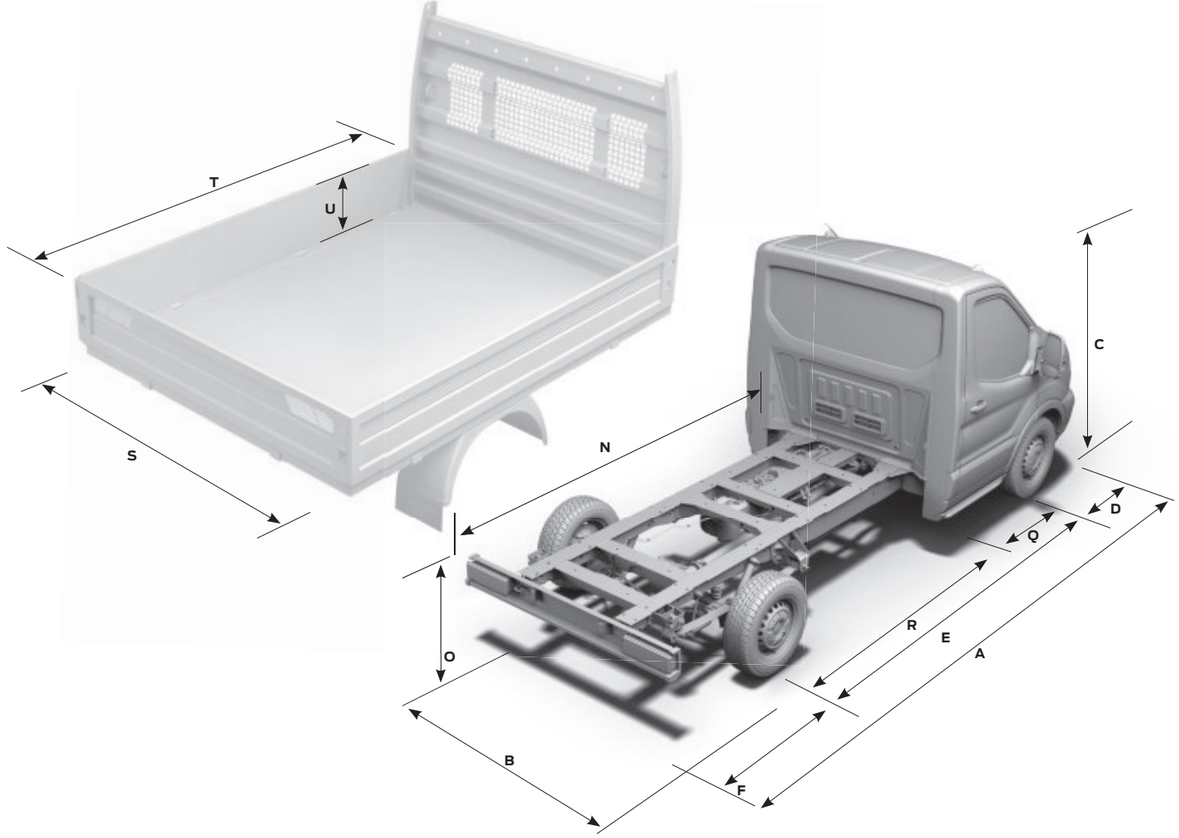

To operate correctly, the AdBlue® tank of your Ford Transit EcoBlue diesel engine must be filled with AdBlue® fluid. System warnings illuminate when fluid level becomes too low. For more information, please discuss with your Ford Dealer.

Fuel, Economy and Emissions

The fuel economy figures quoted in the table below are achieved by following strict EU governed test procedures and are specifically designed to enable customers to compare vehicles from all manufacturers on a like-for-like basis. Fuel consumption is directly affected by the length of the journey; number of passengers and amount of luggage carried; individual driving style; road and traffic conditions; weather conditions; vehicle age, mileage, condition and standard of maintenance; use of vehicle features such as air conditioning; and any modifications to the vehicle such as the addition of a roof rack. Your fuel economy will vary based on these and other factors and, for these reasons, many drivers may not achieve the EU fuel economy figures (below) in day-to-day driving, although the vehicle is technically capable of doing so.

			Fuel consumption in L/100 km[@@@]			Fuel consumption in mpg[@@@]

Note: All Stage 6 EcoBlue figures include Diesel Particulate Filter (cDPF) and Auto-Start-Stop. Auto-Start-Stop system reduces CO_2 emissions and fuel consumption by 6 g/km and between 0.2 and 0.4 L/100km. The used reference mass includes a 'Default Added Mass' (DAM). This regulation method adds an assumed mass to the kerb mass which can exceed reference mass for given engine type, hence not measurable under regulations, represented here as n/a.[@@]The illustrated axle ratio shown is the one available dependent upon model, GVM payload and engine combination. [@@@]The declared fuel consumptions and CO_2 emissions for Stage VI HDT engines are measured according to the technical requirements and specifications of the European Directive 80/1268/EEC and ECE R101.01. The declared fuel consumption and CO_2 emissions for Stage 6 LDTIII engines are measured according to the technical requirements and specifications of European Regulation (EC) 715/2007 and latest amendment. Fuel consumption and CO_2 emissions are specified for a vehicle variant and not for a single car. The applied standard test procedure enables a comparison between different vehicle types; the specification and options selected may have an effect i.e. on vehicle weight and therefore on the emissions and fuel economy of the vehicle and also may influence the figures that appear in the individual vehicle documentation. This information is not part of any product offer made. Real world fuel consumption can vary as the fuel efficiency of a vehicle is influenced by (individual) vehicle configurations, driving behaviour, use of technical equipment such as air conditioning, as well as other non-technical factors.

Engine undershield

Tough corrosion-resistant metal undershield protects engine from accidental stone and kerb damage. Easily removed for oil changes and routine servicing. (Option and accessory)

[@]The illustrated axle ratio shown is the one available dependent upon model, GVM payload and engine combination. (a) Max braked trailer mass is dependent on chosen engine power and dependent on the additional options/equipment selected. Consult your Dealer for more information. **** Max trailer weight will need to be reduced if maximum payload is to be achieved so as not to exceed maximum GTM.**

A smooth driving experience

SelectShift automatic transmission

For greater comfort and convenience in urban driving, Transit front-wheel drive derivatives can be specified with a six-speed SelectShift automatic transmission. Offering smooth, responsive and efficient performance, the transmission also provides the option of manual shifting using buttons on the gear lever. (Option on front-wheel drive models)

Type – Ply/GRP panel box, shutter door, alu framed with steel rear frame for retro-fit Tail-lift capability	–	●
FWD – Polyester/Foam-core sandwich panel box.Aluminium slat roller shutter, framed with steel rearframe for retro-fit tail-lift capability	●	–
Colour – Frozen white only – Ply/GRP composite panels and aluminium wide-lath rear shutter. Anodised aluminium exterior frame work and steel rear frame in white powder-coat finish	–	●
FWD – Frozen white only – Polyester/Foam Core panels. Deadlock alumium slat roller shutter with Pull Bar. Rearframe in poweder-coated Z140 (galvanised) steel.	●	–
Understructure – Full-length anodised aluminium longitudinals, galvanised steel 'C' section crossbearers	–	●
FWD – Full High Strength Z140 (galvanised) steel with longitudinals and cross bearers in dark grey including Cruciform	●	–
Bodysides – Self-coloured 11mm Ply/GRP composite panels, aluminium reinforcements bonded to interior surface for load retention rails	–	●
FWD – Foam-core sandwich panel bodysides and front bulk head	●	–
Structure – Extruded aluminium frame anodised, with cast aluminium corners	–	●
FWD – Extruded aluminium frame anodised, with cast aluminium corners	●	–
Rear Frame – Powder-coated steel frame incorporating end outline marker lamps, rain channel, anti-slip surface to rear aperture step. 960hr salt spray compliant	–	●
FWD – Rear frame manufactured from Z140 galvanised steel incorporating centrally mounted upper stop lamp, rain channel and anti slip to lower panel	●	–
Roof – Translucent GRP roof panels, crowned aluminium roof sticks, cast alumininium corners	–	●
FWD – Translucent Polyester roof panels with steel crowned roof bows	●	–
Floor – One-piece embossed 15 mm thick phenolic resin full birch plywood	–	●
FWD – One-piece embossed 15 mm thick phenolic resin full birch plywood	●	–
Door – Aluminium Wide slat rear shutter, powder-coated frozen white with lower lip seal. External rubber lip seals to door frame aperture sides, with one internal webbing pull cord	–	●
FWD – Narrow flat roller shutter door, poweder coated frozen white. Balloon seal to lower edge. Lip seals to sides. Brush seal to top. Pull cord to left hand side	●	–
Door Lock – Slam shut latch with facility for padlock. Internal emergency door release system with high strength steel load protection panel to lower lath	–	●
FWD – Slam close with key lock. Exterior latching 'Pull Handle Lock Bar' with internal elasticated pull cord for closing. Internal emergency release point.	●	–
Handrail – full height, mounted at the rear near-side	–	●
FWD – Tubular 3/4 height, mounted at the rear near-side	●	–
Lighting – work lamp mounted on top of interior handrail, can be rotated to illuminate interior and exterior	–	●
FWD – Interior PIR, operated and timer lighting. LED work lamp mounted on top of interior handrail, can be rotated to illuminate tail lift	●	–
Rear Step – Full-width steel, powder-coated yellow	–	●
FWD – Full width aluminium Hi Viz Rear Step	●	–
Longditudional Load Lashing – Interior Load restraint system, 4 horizontal lashing/load-lock rails per bodyside with twin integral rubber strips per rail. Deck level lashing points (6 off 400Kg) for additional security/low centre of gravity loads	–	●
FWD – Three rows of multipoint load lashing	●	–
Load pole – 3x400kg rated telescopic load retention poles	–	●
FWD – 2 x 400kg rated yellow telescopic load retention poles	●	–
Hardware: Zinc plated to 504hr salt spray compliant standards	–	●
FWD – Stainless steel and geomet rated to 504hr salt spray	●	–
Body Warranty – 3-year, 100,000 miles	●	●

● = Standard, ○ = Option, at extra cost. RPO tow bar is not available.
Note: Drawings are representative and may be subject to change. Fittings and equipment subject to change.

Tyre Pressure Monitoring System

Sensors in the valve bodies monitor the tyre pressures and transmit the data wirelessly to an instrument panel display. (Option. Not available with dual rear wheels)

Rubber floor mats

Equipped with the Transit nameplate. All-weather rubberised floor mats are tailor-made to fit your Ford perfectly and protect against dirt and damp. Securely fixes directly onto the vehicle's floor. (Accessory)

Exterior features

Design features	Base
Cab – H1 (Low Roof)	●
Fixed rear window	●
Premium aluminium (body colour) dropside float, narrow – Tailboard support straps, and mesh headboard second unit with posts (Single Cab L1 models only)	○
Standard Anodised aluminium side float, wide – Tailboard support straps, mesh headboard second unit and side and rear marker lights without posts (Only available on L2 FWD Single Cab models)	○
Premium aluminium (body colour) dropside float, wide – Tailboard support straps, mesh headboard second unit and side and rear marker lights with posts (not available on L1 models)	○
Door mirrors – Blind spot eliminator and integrated side indicator	●

Wipers – Front, variable/intermittent with electric wash	●
Wipers – Front, automatic with rain sensor (includes automatic headlights)	□
Option pack	
Low Visability Pack – Includes heated front screen and screen washer level lamp (heated power short arm mirrors are standard - Long arm mirrors can be ordered as an option at additional cost)	○
High Visibility Pack - Includes power heated and poer fold mirrors, Quickclear windscreen, automatic headlights, rain sensitive wipers and front fog lights	○

● = Standard, ○ = Option, at extra cost □ = Part of an option pack, at extra cost.
*The wheel you choose will be fitted with the tyre size noted, but no choice of tyre brand is available.

Control at your fingertips

Steering wheel-mounted controls
Allows you to operate the audio system and trip computer without taking your hands off the wheel. (Standard with Ford audio systems)

Lidded storage compartment with power point and USB port
Cleverly concealed storage compartment, located above the instrument cluster, features a 12-volt power supply and USB port. (Standard with Ford audio systems)

Bluetooth® Audio Streaming
Stream your music collection from your compatible MP3 player or mobile phone to the vehicle's audio system.

Navigation
3D map shows points of interest on Ford SYNC 3's 6" colour touchscreen. (Option)

Audible SMS
Have your incoming text messages read to you from your connected phone, including commonly-used abbreviations and emoticons, and you can even respond with a choice of 15 preset text messages. Compatible mobile phone required.

Emergency Assistance*
Innovative SYNC feature that uses a Bluetooth®-paired and connected mobile phone to help vehicle occupants initiate a direct call to the local Communications Centre (in more than 40 European countries and regions), following a vehicle crash event involving an airbag deployment or fuel pump shut off. (Option, part of Ford SYNC)

Complete connectivity
Ford SYNC with AppLink* lets you operate most popular MP3 players, Bluetooth®-enabled phones, USB drives and even control the apps on your smartphone with remarkably simple voice commands. Plus, the Emergency Assistance* feature is designed to assist occupants to place an emergency call in the event of an accident in over 40 European countries and regions. (Option)

SYNC

EURO NCAP advanced
2012 Reward for Ford SYNC with Emergency Assistance

*Compatible and connected mobile phone required. You can browse a list of AppLink-compatible apps from your regional Ford website, or via the **App Catalog** available in iOS and Android stores. SYNC AppLink and Emergency Assistance are not supported by all European languages.
Note The Bluetooth® word mark and logos are owned by the Bluetooth SIG, Inc. and any use of such marks by Ford Motor Company Limited and its associated companies is under licence. Other trademarks and trade names are those of their respective owners.

Ford Emergency Assistance is an innovative SYNC feature that uses a Bluetooth®-paired and connected mobile phone to help vehicle occupants initiate a direct call to the local Communications Centre, following a vehicle crash event involving an airbag deployment or fuel pump shut off. The feature operates in more than 40 European countries and region.
The Bluetooth® word mark and logos are owned by the Bluetooth SIG, Inc. and any use of such marks by Ford Motor Company Limited and its associated companies is under licence. Other trademarks and trade names are those of their respective owners.

A place for everything

Transit's driver-focused cab combines modern good looks with smart stowage solutions. With plenty of space for bottles, phones and papers, it will help make your workday easier and more efficient.

230 V power socket
A handy 150 W 230 V power socket, located between the driver's and passenger seats, can be used to charge tools, laptops or other electrical equipment without the need for special adaptors. (Option)

Underseat stowage compartment
The front dual passenger seat cushions flip up to reveal a hidden compartment large enough to hold a toolbox. (Standard) The centre seat also incorporates a fold-down table, large enough to hold an A4 clipboard, tablet or a laptop computer.

Mechanical features

	Base
Engine technology	
Auto-Start-Stop system (not available with AWD, standard with automatic transmission)	○

*For details of the configurations available please consult your Ford Dealer. **Please note:** Configurable locking must be defined at the time of order, it cannot be ordered as a Dealer-fitted option or accessory.
***Note: A rear-facing child seat should never be placed in the front passenger seat when the Ford vehicle is equipped with an operational front passenger's airbag.**

Tested to extremes

From frost-covered prototypes started up in -40 °C at 4,500-metre altitudes, to sun-baked vehicles towing fully-laden trailers up long inclines in 50 °C heat, Transit Chassis Cab has been pushed to extremes.

○ = Option, at extra cost.
◆ SVO paint suffix must be entered at time of ordering. SVO paint pulls self-colour (black) bumpers, bodyside mouldings, mirror housings and door handles.

Connect with the road

Even better ride and handling
Ford Transit's renowned driving qualities have been fine-tuned with stiffer suspension mounting bushes and brackets, and an anti-roll bar.

Torque Vectoring Control[ø]
This technology is designed to improve traction, roadholding and agility when cornering by continuously optimising the engine torque distributed to each front wheel to match the amount of grip each has available. The result is a more rewarding driving experience. (Standard)

[ø]Uses sensors.

Making life easy

Our range of finance, service and assistance options is designed with just one thing in mind – making life easy for you.

Ford Business Service

Efficiency, accuracy and convenience are at the heart of the Ford Transit24 commercial vehicle service promise. Therefore, whether it is servicing, maintenance or repair you need, be sure to come and see us.

- Available from all Transit Centres and Transit Service dealers
- While-you-wait servicing by prior appointment
- Late night servicing available at least once per week
- Priority treatment for urgent repairs
- Vehicle off the road repairs (VOR)*
- Collection and delivery**
- Testing and MOTs
- Transparent pricing
- Genuine Ford parts quality
- Ford-trained technicians
- Interim checks for optimum vehicle performance
- Service Activated Roadside Assistance†
- Ford Protect packages to suit you
- One Call to access all the Ford services you need

For more information and to find your nearest participating Ford Commercial Vehicle Dealer, visit the aftersales support section at www.ford.co.uk/transit24

*Repairs will start on the same working day (as long as you bring your vehicle in before 3pm), or at least within 24 hours of its arrival. If we need to order parts, we'll begin work the day they're delivered. 'Vehicle off road' repairs should be completed within 24-hours.

**Your Transit Centre can arrange to collect your vehicle and deliver it back to you after service or repairs, so you can get on with running your business. By arrangement and limited to a specific mileage radius of the dealer. Contact your local dealer to discuss your requirements.

†Available at participating Dealers only. Roadside Assistance is activated automatically at every routine service with coverage extended valid from the date of service for 12 months, or until the next service is due, whichever comes first. See Ford.co.uk/roadsideassistance for more information.

Dedicated backup from Ford

Ford Fleet Electronic Recall Programme This simplifies the process of recalls and improves communications with the operators of affected vehicles.

Ford Fleet Service Centre A dedicated team of experienced service advisors to assist with your aftersales issues.

Ford Fleet Accident Management Whatever the make of the vehicle, we offer a free, ethical and comprehensive accident management programme.

Efficiency, accuracy and convenience are at the heart of the Ford Transit24 commercial vehicle service promise. So, whether it's servicing, maintenance or repair you need, be sure to come and see us.

For more information and to find your nearest Transit Service Dealer, visit the aftersales support section at www.ford.co.uk/fordfleet

The Ford Transit is covered by the Ford Corrosion Protection Warranty for 12 years from the date of first registration. Subject to terms and conditions.

Note The vehicle images used are to illustrate body colours only and may not reflect current specification. Colours and trims reproduced within this brochure may vary from the actual colours, due to the limitations of the printing processes used.

12-year perforation warranty

The Transit owes its durable exterior to a thorough multi-stage painting process. From the wax-injected steel body sections to the hard-wearing top coat, new materials and application processes ensure it will retain its good looks for many years to come.

Illustrations, descriptions and specifications. This catalogue was correct at the time of going to print. However, Ford policy is one of continuous product development. The right is reserved to change specifications, colours and recommended prices of the models and items illustrated and described in this publication at any time. For the latest details always consult your Ford Dealer. **Optional equipment.** Throughout this publication, wherever a feature is described as being an 'Option' or 'Option Fitment/Pack' etc, you should assume that it will be at extra cost to the base vehicle, unless specifically stated to the contrary. All models and colour combinations are subject to availability. **Note.** Some images portrayed are of a pre-production model and/or are computer generated, therefore, the design/features on the final version of the vehicle may differ in various respects. In addition, some of the features shown on the vehicles may be optional. **Note.** This brochure contains both original Ford accessories as well as a range of products from our suppliers. Fitment of accessories may have an impact on your vehicle's fuel consumption. ✚ The identified accessories are carefully selected third party supplier branded accessories which do not come with a Ford warranty but are covered by the third party supplier's own warranty, the details of which can be obtained from your Ford Dealer. **Note.** The Bluetooth® word mark and logos are owned by the Bluetooth SIG, Inc. and any use of such marks by Ford Motor Company is under licence. The iPod word mark and logos are the property of Apple Inc. Other trademarks and trade names are those of their respective owners. **Note.** Some driver assistance features and safety features described in this brochure are designed to function using sensors, whose performance may be affected under certain weather or environmental conditions.

The Government fuel figures do not express or imply any guarantee of the fuel consumption of any particular vehicle. The vehicles themselves have not been tested and there are inevitably differences between individual vehicles of the same model. In addition, a vehicle may incorporate particular modifications. Furthermore, the driver's style and road and traffic conditions, as well as the extent to which the vehicle has been driven and the standard of maintenance, will affect its fuel consumption. **Insurance groups** are only as recommended by the Association of British Insurers. You should always consult your insurance adviser for confirmation.

bp

Ford and BP – working together to reduce fuel consumption and emissions.
